

encouragement to grow and develop into productive members of society. We see the fruits of their patience and selfless dedication every day in our children and in ourselves. Building a cohesive relationship between teachers and the administration in charge of managing their school district is essential to extracting the most from our talented educators.

This is why I am honored to recognize Dr. Sandra Mossman's contribution to the Clear Creek Independent School District. She has been nominated to receive the 2007 Superintendent of the Year Award given annually since 1984 by the Texas Association of School Boards in Austin. The award is adjudicated based on several criteria relating to the efficient administration of education in the district and is determined by an elected board of members representing over 4.5 million students. She represents one of 17 regional superintendents around the state who have been acknowledged for their outstanding leadership skills and commitment to education. Dr. Mossman has been an innovative superintendent, pursuing initiatives that diversify the educational experiences of her students. She was instrumental in introducing the Early College in High School track that would allow high school students to take classes at a local college and even receive a 2-year college degree after fulfilling all their requirements. This is just one example of Dr. Mossman's important role in raising the standards of education for our children, and I certainly hope she will be recognized for her efforts at the TASB Convention in late August in Dallas. I am sure she will continue to inspire and lead young people and her colleagues alike to strive for the highest goals when examining education in this country.

As noted historian Henry Adams once said, "A teacher affects eternity; they can never tell where their influence stops." It is a thought that should motivate all of us to follow the shining example Dr. Mossman has set of what it means to be a committed leader in education in Texas.

HONORING HOPE FOR VISION

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 1, 2007

Ms. ROS-LEHTINEN. Madam Speaker, I would like to recognize an organization which is leading the fight against vision loss. Hope for Vision was founded to assist individuals dealing with the loss of vision, and to raise much needed funding for scientific research on retinal degenerative and other blinding diseases, so that future generations will not have to cope with this tragic issue.

I have the distinct pleasure and honor of being involved in this wonderful organization, and serve as an honorary member of the Board of Advisors. I also am proud to call several integral members of this organization including the Lidsky family, my friends. I have known Carlos and Betty Lidsky for many years and their son, Isaac, an attorney here in Washington, serves as the Chairman and President of Hope for Vision.

At the age of 12, Isaac was diagnosed with retinitis pigmentosa, a retinal degenerative dis-

order. However, this did not slow Isaac down. He attended New World School of the Arts in Miami before receiving a bachelor's and law degree from Harvard University. While at Harvard, he met his wife, Dorothy, who has become a passionate advocate for the vision-impaired.

This family has been deeply impacted with degenerative retinal diseases and they have fought to ensure this horrible condition receives the proper attention and research needed to find a cure. Their tenacity and courage in the face of such adversity and heartbreak is commendable. Inspired by their dedication and hard work, we are working towards a cure.

The Lidsky family has always been an outspoken advocate to raise awareness for issues surrounding inherited vision diseases. Vision loss is a problem which affects millions of Americans. More than 80 million Americans have a potentially blinding eye disease: 3 million have low vision; 1.1 million are legally blind; and an additional 200,000 are severely visually impaired. However, research efforts into vision loss and blindness have already started to pay dividends. For example, scientists have provided vision to the blind through microchip technologies, and clinical trials have started with pharmaceutical treatments to combat vision loss.

Research grants provided by Hope for Vision are providing our scientists with much needed funding to further progress on these initiatives. An example of this progress is the partnership between Hope for Vision and the Bascom Palmer Eye Institute, located at the University of Miami in my Congressional District. These two organizations have teamed up to provide the best vision care possible for South Floridians by advancing research and treatment capabilities with two new innovative programs. With the help of the Department of Defense, they have developed the Miami Project for Ophthalmic Innovation to use the remarkable military technological advances to bring new therapies to patients. The goal of this project is to bring together ideas and people from diverse backgrounds to implement research projects aimed at enhancing military ocular health capabilities. It will directly benefit our brave men and women serving in uniform, our veterans, as well as the millions of other Americans who suffer from blinding eye trauma and disease.

Another initiative is the newly-created Center for Hereditary Retinal Diseases at Bascom Palmer, which owes its very existence to Hope for Vision. Its goal is to identify every individual in the state of Florida with an inherited eye disease and to provide them with genetic testing, counseling, and innovative treatments.

Bascom Palmer Eye Institute is recognized as one of the world's finest and most progressive centers for eye care, research and education. This year, U.S. News & World Report's survey rated Bascom Palmer the Number 1 eye hospital in the country. Its dedicated staff provides excellent vision care to more than 200,000 patients annually at their facilities across South Florida.

I am also proud to be a founding member and co-chair of the Congressional Vision Caucus. This organization is a bipartisan coalition dedicated to strengthening and stimulating a national dialogue and policy on vision-related

problems and disabilities. Our responsibility is to raise awareness about the increasing number of Americans at risk for age-related diseases, preserve and protect eyesight, and ensure adequate resources are directed towards the research, prevention and treatment of eye disease.

I have worked together with my colleagues in the South Florida Congressional delegation to ensure that Hope for Vision has the funds necessary to continue their work to discover treatments and cures for degenerative retinal diseases. As the baby boom generation reaches retirement age, vision loss will become an increasingly familiar issue for many American families.

Once again, I would to congratulate Hope for Vision on its successes, and look forward to working with this organization as it continues to address an issue of growing importance.

COMMENDING THE FEMALE SOCCER PLAYERS OF THE NORTH JERSEY ALL-STARS

HON. SCOTT GARRETT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, August 1, 2007

Mr. GARRETT of New Jersey. Madam Speaker, I rise today to pay tribute to New Jersey's 18 newest young ambassadors, the female soccer players of the North Jersey All-Stars. Today, they will set off from JFK Airport in New York for a two-week trip of good will and sportsmanship on the East Coast of Brazil.

While in the coastal cities of Sao Mateus and Jaguare, the team of soccer superstars will play five games with local players, will deliver more than \$15,000 in donated soccer equipment and sportsgear, and will spread a message of friendship to the people of Brazil. While most Americans traveling to Brazil, spend their days and nights in the touristy resorts, like Rio de Janeiro, these girls will be visiting a more remote and isolated, and far less wealthy, region.

These high school-aged soccer players will be accompanied by their manager, David Heitman; trainers, Karen Hartigan and Phil Ross; and a local reporter, Brian Farrell. They will also be traveling with their coach, former professional soccer player, Roberto Ferman. The North Jersey All-Stars are: Zoey Talias of Wyckoff, Anna Rothschild of River Edge, Ashley Walker of Mahwah, Nicolle Sanchez of Lyndhurst, Amanda Soto of Mahwah, Faith Tucker of Rutherford, Lexi Hutton of Basking Ridge, Christy Shedlock of North Haledon, Katy Generelli of Spotswood, Karen Schoepflin of Oakland, Brielle Heitman of Mahwah, Janelle Biagini of Wyckoff, Kelly TenEyck of Mahwah, Brooke Bandazian of Wyckoff, Chelsea Marie Wuesthoff of Ironia, Sarah Royse of Northvale, Catherine Wolff of Wyckoff, Mimi Kocela of Waldwick.

I commend these young women for their dedication to their sport and for their efforts to use that sport to spread a message of good will and sportsmanship overseas.
